Once your students are added, you can do these 3 things to prepare for your first day of class.

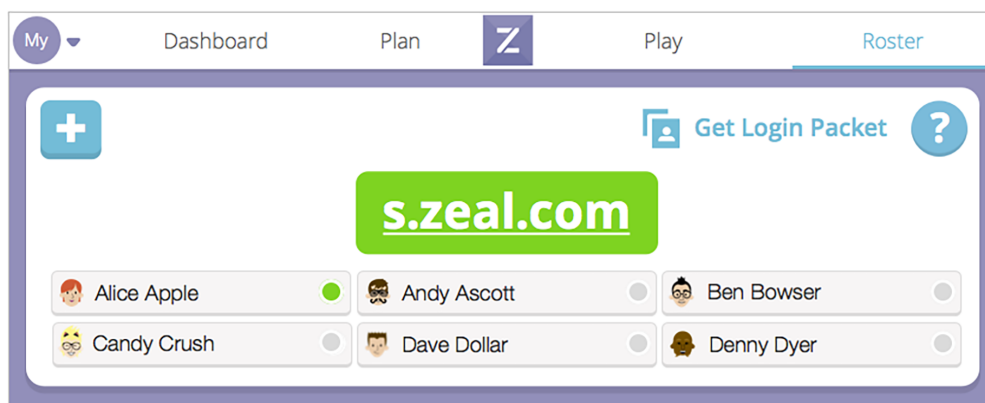

Print the Login Packet. We recommend printing the Student Login Cards and handing them out to your students.

2

Create s.zeal.com bookmarks on your class computers to speed up login. This is the address students will use every time they login to Zeal.

3

Get your students logged in by picking a date and making a plan for using Zeal for the first time. Many teachers have all students jump on at once, while others first attempt with small groups of students.

That's it for preparation! To monitor login progress, keep your Roster screen open while students login to Zeal! Then go to the Plan screen to see results as they come in!
